Left-handed writing setup

Name _____

Card for parents and teachers

Small changes that make writing much easier for left-handed children.

1. **Tilt the paper** ☐
   Top of the paper turned to the right, about as much as the hands of a clock at five past.

2. **Paper to the left** ☐
   Place the paper in front of the left shoulder, not in the middle.

3. **Grip a bit higher** ☐
   Hold the pencil a little further from the tip so you can see what you write.

4. **Wrist below the line** ☐
   Keep the wrist under the writing line instead of hooked above it.

5. **Sit on the left** ☐
   Sit on the left of a right-handed child so elbows do not bump.

Never ask a left-handed child to switch hands.
